# Assessment for learning

Revision

\*Difference between Assessment, Measurement and Evaluation\*

Answer:-

Meaning

- ◆ Assessment is a process of collecting, reviewing and using the data for purpose of improvement of current performance.
- ◆ Evaluation is a process of passing the judgement on the basis of set of standard determined.
- ◆ Measurement is a process of assignment of numbers under some pre-determined scale.

## Difference between evaluation, measurement, assessment

To sum up, we measure distance, we assess learning, and we evaluate results in terms of some set of criteria.

1. **Measurement** is the process of the delegation of a numerical index to the object consistently and meaningfully.
2. It has quantitative information.
3. It involves observations which can be expressed in numerical terms.

1. **Assessment** is a process by which the information is obtained

Assessment is the systematic basis for making inferences about the learning and development of students.

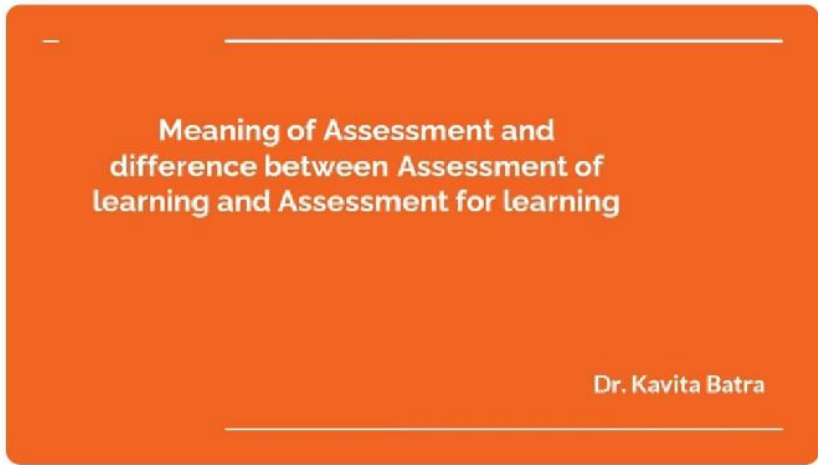

### Principles of assessment are:

**Validity** any assessment which is conducted must directly relate to that which is being assessed. For example, if we wanted to assess whether you can design an assessment instrument we could not assess you by asking you to run around the block. The activity does not relate to that which is being assessed.

**Reliability** does the assessment provide for the same outcome (assessment decision) regardless

## संरचनात्मक मूल्यांकन के गुण और दोष

गुण\_ (1) रचनात्मक मूल्यांकन का सबसे महत्वपूर्ण गुण यह है कि यह छात्रों को प्रतिपुष्टि प्रदान करता है कि वह किस बिंदु पर प्रबल है और किस में कमजोर है। (2) यह अध्यापकों को प्रतिपुष्टि प्रदान करता है कि उनके द्वारा प्रयोग की गई विधियां और व्यू रचना की प्रभावशीलता कितनी है और उन्हें किस कौशल में सुधार करना है। (3) यह अधिगम में आने वाली कठिनाइयों का निवारण करने में सहायक है। (4) यह शैक्षिक व्यवस्था की स्थिति का आकलन करने में सहायक है। (5) यह उपचारात्मक उपायों को सुझाता है। (6) यह शिक्षण-अधिगम प्रक्रिया को अधिक प्रभावी बनाता है। (7) अधिगम हेतु उचित कर्म तैयार करने में सहायक। दोष। रचनात्मक मूल्यांकन एक ही इकाई के बाद किया जा सकता है, जिसे छात्र गंभीरता से न

## About the Program

No doubt, after Covid 19 pandemic digitalisation is becoming a vital part of our lives but it has also created a digital divide where large proportions of teachers and students are left out of this paradigm shift, and for this both can't be blamed because digital literacy is a skill that needs to be imparted through proper training. Digital literacy is the ability to access technology independently in an effective and secure manner. This program will help the academic community to acquire various digital competencies that will enable them to use digital technologies and online resources in professional and academic contexts.

## About the Workshop

Educational process performs its best when it focuses on thinking as well as understanding, rather than on mere rote memorisation. Constructivism provides the convenience to the teachers to create and render opportunities to students to be actively involved in teaching-learning process, so that learning can be embedded in realistic contexts. Hence, in order to make the students successful in and out of the school, let us learn to create such kind of learning environment that facilitates the students to construct the knowledge instead of receiving it.

This workshop will help teacher educators, pupil teachers, in-service teachers of all stature and policy makers to implement the constructivist approach in educational settings. Our speakers will discuss on "Learning to Learn", "Constructivism in Education", "Lesson planning based on constructivist approach", and "Implications of Constructivist Approach in Teacher Education Programmes".

2 **Arithmetic Progression:** If various terms of a sequence are formed by adding a fixed number to the previous term or the difference between two successive terms is a fixed number, then the sequence is called AP.  
e.g. |) 2, 4, 6, 8, ..... the sequence of even numbers is an example of AP  
2) 5, 10, 15, 20, 25, ....  
In this each term is obtained by adding 5 to the preceding term except first term.

3 **Illustrative example for A.P.**  
 $a, a+d, a+2d, a+3d, \dots$

4 **The general form of an Arithmetic Progression is**  
 $a, a + d, a + 2d, a + 3d, \dots, a + (n-1)d$
